

Complete Security Unleashed: **Secury360** Solves, Secures, Succeeds

Secury360 stands at the cutting edge of the security technology, a pioneering force that's reshaping the very landscape of perimeter detection. Our solution, as precise and proactive as it is intuitive, upgrades existing camera systems and integrates smoothly with control room workflows, elevating them to new levels of capability.

Choosing Secury360 means more than investing in a product - it's aligning with a revolution. Like joining an expedition to the summit, you're part of an exciting journey where advanced technology meets impeccable service, ensuring unparalleled peace of mind. With Secury360, we climb together towards the future of security technology.

The box.

The S360 box contains the best hardware, which can also run VMS like Nx. All at once, no extra PC needed. The box software is compatible with all types of cameras - they don't even have to be smart. As long as they are HD, end- users can get started!

Designed and made in Belgium	Passive cooling for enhanced reliability and noise reduction
Low power and bandwidth consumption	Custom motherboard
Integration has never been easier	Internal IO
Future-ready camera expansion	4G on-board
VMS function with Network Optix	5 years warranty
Expanded storage capabilities with 3.5" HDD with drive bay	Little bandwidth of 3.2 GB standard, 2 GB when 4G is active

The Portal.

Our portal keeps it simple. And our partners love us for it. Some time-saving features our partners value:

- Manage cameras directly
- Automatic monitoring/dismarming
- User roles with permissions
- Graphical detection overview
- Up to 30-day clip viewing
- Detailed event logs

The App.

In the era of smart technology, the Secury360 app provides on-the-go access and streamlined control for modern users.

Key features include:

- Instant alerts for swift responses
- Geo-fencing for location-based automation
- Real-time insights on security events
- Detailed event logs
